

Executive Service Summary

Initial Assessment Evaluation

- OS configuration
- SQL Server configuration
- Space structure
- Connectivity structure

Overall SQL Server Evolution

- Backup/recovery procedures
- Security structure
- Database structure
- Database maintenance

Setup Plan

- Database backup plan
- Transaction Log backup plan
- Database maintenance plan
- Performance plan

Monitor Operating System

- Physical disk space
- CPU utilization
- Memory utilization/paging
- Cache utilization
- Disk queue length
- Page faults

Monitor SQL Server

- SQL Server memory
- Dead locks
- Locking issues
- Errors messages
- Performance/optimization/tuning
- Server security and logins
- Transact Log size
- Long running queries
- Scheduled jobs
- Disk space verification

Monitor Databases

- Database availability and status
- Database fragmentation
- Database errors
- Backup verification
- Index corruptions
- Database space utilization
- Database security
- Data corruption

In Addition

- Script database(s) schemas
- Script logins
- Operating system configuration
- Transact log reports
- Remote backup
- SQL Server configuration
